

Changing the Experience of Prostate Surgery

Cabell Huntington Hospital is the only hospital within a 120-mile radius of Huntington to have acquired the da Vinci Surgical System, a state-of-the-art robotic platform designed to enable complex minimally invasive surgery with greater precision.

With the September arrival of Dr. James C. Jensen, a urologic oncologist highly experienced with the da Vinci system, Cabell Huntington Hospital and University Urological Associates will be able to offer patients with prostate cancer the world's most advanced surgical treatment – da Vinci Prostatectomy.

For most patients, da Vinci Prostatectomy offers numerous benefits over open prostatectomy, including:

- Shorter hospital stay
- Less pain
- Less risk of infection
- Less blood loss
- Less scarring
- Faster recovery
- Quicker return to normal activities
- Reduced risk of incontinence and impotence
- Improved cancer control
